

IN THE ABSTRACT

Please amend the Abstract as follows.

Disclosed herein are Pseudoplastic-pseudoplastic aqueous dispersions comprising having solid  
and/or high-viscosity particles (A), dimensionally stable under storage and application  
conditions, in dispersion in a continuous aqueous phase (B), the dispersion comprising having at  
least one solid polyurethanepolyol (C) containing cycloaliphatic structural units and having a  
glass transition temperature  $> 15^{\circ}\text{C}$ , processes for preparing them, and their use.
